LAB PROBLEM LIST

Course Title: Digital Signal Processing Sessional

Course Code: CSE 3208

Problem No.	Problem Name
01	Convert continuous time signal to discrete time signal.
02	Perform addition operation of signals.
03	Perform multiplication operation of signals.
04	Perform amplitude scaling of signals.
05	Find even and odd components of a signal.
06	Perform convolution operation.
07	Perform deconvolution operation.
08	Perform circular convolution [Circle Method]
09	Perform circular convolution [Matrix Method]
10	Implement Fourier Series.
11	Implement Fourier Transform.
